

➤ Introducing the MacroTrac™ Family

Portable Flooring Optimized for Quick Deployment and Excellent Performance

MacroTrac™

Innovation by Design

Rola-Trac® North America and Macro Plastics have combined a true spirit of innovation and a long successful history of manufacturing top quality injection-molded plastic products to set a new standard for excellence and offer you one of the highest quality plastic flooring systems available on the market today. Taking advantage of Macro Plastics core competencies, the full line of Rola-Trac products will now be manufactured and offered under the MacroTrac™ family brand in North America.

The MacroTrac flooring and roadway products have been used successfully to cover some of the most valuable turf and most hostile terrain in the world for decades. Over two million square feet of MacroTrac flooring and roadways have been installed in North America alone. Quick, efficient deployment and excellent performance make MacroTrac products the ideal choice for event and military portable flooring, temporary roadways, and helipad projects.

MARKETS SERVED

MILITARY

Used by leading military forces, including all NATO countries.

AVIATION

Deployable for a variety of aircraft types and suitable for helicopter operations.

EVENTS

Ideal temporary flooring solutions for stadiums, exhibitions, and pathways.

CONSTRUCTION

Excellent turf protection and safe vehicle and equipment access, even on soft ground.

Macro Plastics is an ISO9002 certified company, assuring excellent quality of products and services.

MacroTrac products are designed for quick deployment and excellent performance:

- Manufactured from high impact materials providing versatility, superb strength, and high temperature stability
- Constructed of inert and non-conductive materials and resistant to solvents and UV damage
- Easy to clean and install, lightweight and portable, non-corroding, anti-slip, non-reflective, and self draining
- Fully recyclable and available in a range of stock colors: grey, black, white, green, blue, and red
- Can be deployed over most surfaces: grass, sand, soil, snow, gravel, concrete, and tarmac
- High load capacity and resistance to fatigue in extreme weather conditions has made MacroTrac products a staple element in military campaigns around the world

Rola-Trac™

LIGHT WEIGHT EVENT FLOORING AND PEDESTRIAN ACCESS

The flexibility and variety of uses for Rola-Trac™ make it one of the most adaptable flooring systems available, providing more optimal solutions than any other decking system.

Rola-Trac portable flooring systems are used extensively for events and military applications worldwide. Uses include event and tent flooring, hard standing and military tent flooring, field hospitals, walkways, patios, pet areas, outside displays, athletic field coverings, ship storage marine systems, and temporary or semi-permanent wheel chair access.

Extremely fast and easy to install, tools and expertise are not required for installation or extraction, Rola-Trac is deployed in pre-assembled sections — simply lay them next to one another and step to snap along the seams. Rola-Trac can be laid in minutes and deployed over most surfaces.

Supa-Trac LITE™

MEDIUM DUTY EVENT FLOORING AND PEDESTRIAN ACCESS

Supa-Trac LITE™ is the ultimate lightweight portable pedestrian flooring, conforming to almost all ground types and conditions and is flexible enough to be laid over almost any area or shape. Suitable surfaces include: artificial turf, soil, sand or gravel, and all hard-standing surfaces.

Supa-Trac LITE provides ideal temporary flooring solutions for exhibitions, access routes, stadiums, and pathways, with edging ramps available for the elimination of trip hazards. Product can be stored indoors or out for years of flexible use.

With quick installation and extraction, Supa-Trac LITE is the fastest ground cover solution of its type available on the market. Lightweight, portable, and durable, Supa-Trac LITE shares the traditional Supa-Trac design, in a thinner and lighter weight panel. Supa-Trac LITE is the ideal cost-effective solution for nearly all event applications and was designed specifically with the pedestrian in mind, boasting a world class top surface design for traction.

Supa-Trac™

HEAVY DUTY EVENT FLOORING AND ROADWAY SYSTEM

Supa-Trac™ has been extensively proven in the domestic, construction, and events industries and is used daily by leading military forces, including use by all NATO countries. Supa-Trac is suitable for helicopter operations and is deployable for a variety of aircraft types.

In addition to military uses, Supa-Trac can provide coverage for areas where heavy-duty flooring is necessary, providing solutions for temporary car parking, access roads, stadiums, and display flooring for aircraft and vehicles, with a capacity to support vehicles up to 3.5 tons per axle and static weights far greater.

Supa-Trac products are one of the most straightforward temporary flooring systems available. The design allows for rapid deployment with a minimum amount of manpower. Featuring a 60% lighter weight than aluminum counterparts, Supa-Trac is easy to transport and store and can be deployed in rolls or slabs with no special skills or special tools are required.

I-Trac™

PROFESSIONAL GRADE TEMPORARY ROADWAY AND MILITARY DEPLOYMENT SYSTEM

I-Trac™ is a state-of-the-art single component heavy duty access system that enables vehicular traffic over inhospitable or unsafe ground. I-Trac features excellent turf protection and safe vehicle and equipment access, even on soft ground.

The most flexible and highly-capable system brought to market, I-Trac can be deployed as temporary roadway, helipad, or tarmac. The advantage that I-Trac offers as compared to alternative products is its extreme strength to weight ratio. Each panel weighs only 38 pounds and is manually deployable.

I-Trac is a composite interlocking panel system that creates a contiguous surface capable of dealing with all road going vehicles and extreme static loadings. Quick and easy to install and extract, I-Trac can be manually deployed without any special skills or tools.
