

Offering turnkey rental solutions with full-service delivery, installation, and removal of professional grade temporary matting solutions.

The MacroTrac Rental Depot has 2 different grades of rental products available with weekly and monthly rate options. From professional grade, industrial strength I-Trac™ to heavy duty SupaTrac™, you can be sure to find the right roadway or flooring product to meet your needs.

### I-Trac Professional Grade Temporary Roadway

- I-Trac is a patented interlocking modular system that creates a contiguous surface, supporting heavy vehicular traffic over inhospitable or unsafe ground.
- With an extreme strength to weight ratio, I-Trac panels are significant enough to withstand up to 86,400 lbs/Sq Ft., yet are light enough to be installed manually without any special tools.
- Secured by an inbuilt connection device, I-Trac is completely man-handlable and does not require any special installation tools.
- I-Trac is inert to most chemicals and offers a good level of electrical insulation, making it ideal for construction sites, military applications, temporary tarmac, and roadways.

### Supa-Trac Heavy Duty Event Flooring and Roadway System

- Uniquely durable yet lightweight, Supa-Trac is ideal for protecting turf during outdoor events or inside tents where heavy foot traffic may occur.
- With a load capacity up to 36,000 lbs/Sq Ft., Supa-Trac can support the weight of forklifts with pneumatic tires, light trucks and vehicular traffic up to 3.5 tons per axle.
- Deployable in rolls or slabs without special tools, Supa-Trac is one of the quickest temporary floors that can be installed indoors or out.
- Supa-Trac panels allow light, air, and water to reach the ground below, keeping grass alive while protecting turf from the wear of pedestrian or vehicle traffic.
