Returnable transport packaging designed to optimize the global supply chain.

IsoBin™ Family

Sustainable Supply Chain Solutions

Features

25% lighter than standard foldable large containers

2000 lb (900kg) capacity

IsoBins and EuroBins are a fully sustainable returnable trip packaging, made with a polypropylene resin which is 100% recyclable to reduce your carbon footprint

Patented triple wall base is durable and impact-resistant to reduce product damage

The EuroBin 980 can be stacked 6 high when stored fully loaded with product or 3 high when they are being transported. When folded, it can be stacked 10 high in a European Mega Trailer.

Passed UN9 HAZMAT testing at both US and European independent test laboratories.

All bins available in UL94-V2 rated flame-resistant resin

Easy to handle with universal reach through latches

IsoBins and EuroBins are designed with safety in mind; they have a unique interlocking foot design for safer and more reliable stacking

Industry exclusive modular design allows for replaceable pallet straps, drop doors, and sidewalls.

Product identification is quick and easy with four label areas; RFID tags are optional

High Visibility pallet straps

Overlift lids and dust covers are available*

*Visit iplmacro.com for more details.

Why Reusable?

Reusable containers create tremendous environmental advantages by conserving materials and resources, reducing waste, and lowering packaging costs.

Why IPL Macro?

IsoBin and EuroBin have proven best in class durability and total cost of ownership.

In 2018 we joined 1% for the Planet – an organization whose members contribute at least one percent of their annual sales to environmental causes. As current members, we have pledged one percent of the revenue from our Hybrid line of bin products to environmental nonprofits.
