

GONE FOR GOOD MISSION

Gone For Good is a social enterprise of United Cerebral Palsy of the North Bay, employing adults with disabilities, adults with barriers to employment and adults who support workers with disabilities. Gone For Good's mission is to operate recycling programs and e-waste recycling, while employing people with disabilities. We operate both on-site, in our warehouse or off-site at your location, depending on your need.

We are a full-service recycling company that can help change the shape of what matters most to you, to our industry, and to the planet. We have developed a methodology that extracts the maximum value from materials and equipment while minimizing our impact on the environment. Please contact us with any questions. Thank you.
